Coley Primary School – Knowledge Organiser

SUBJECT FOCUS:	Summer and Growing	FS2	TERM 5

WHAT? – Key Knowledge

Summmer is one of the four seasons of the year. It comes after spring and before autumn. Summer is the months of June, July and August. In the summer the days are long and the nights are short. The weather is warm and often hot and there is less rain.

Plants continue to flower and grow in the summer and fruits such as strawberries and raspberries will be ready to pick and eat.

We need to protect our skin and eyes from the bright summer sunshine by wearing suncream, hats and sun glasses.

Lots of people like to visit places like the park and the beach in the summer and enjoy treats like ice cream.

Growing

Spring and summer are a good time to plant and grow flowers and some types of fruit and vegetables.
Plants can grow from a seed.

Seeds can come in lots of different sizes, shapes and colours. Tiny seeds can grow to enormous plants.

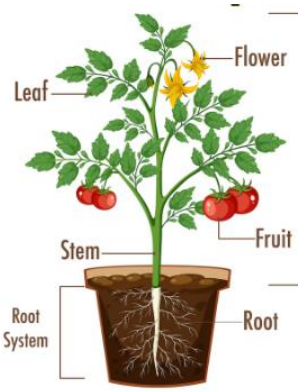

Key Vocabulary	
Summer	The season after spring
Season	One of the four parts of the year.
Seed	Can grow into fruits, flowers, plants or trees.
Shoot	The first part of a seed that appears above ground.
